The facts about lung cancer

- Lung cancer is America's deadliest cancer with a five-year survival rate of 18%
- Half of lung cancer diagnoses happen to nonsmokers, either former or never-smokers
- Lung cancer cases among women are on the rise and being found at younger ages

What your gift will do

- *Retain promising talent* in the lung cancer research field by offering grants and salary support to carefully chosen **A Breath of Hope Research Fellows** throughout the U.S.
- *Support clinics and hospitals* with lung screening grants for earlier detection
- *Educate the public* about the causes, risks, symptoms, available screening and common fallacies of lung cancer
- *Support lung cancer patients & families* with nonjudgmental care, patient education, survivor groups, grief groups, rides to medical appointments and companionship

You are invited
to join...

A Breath of Hope

Circle of Light

*A circle of individual donors
committed to saving lives by
changing lung cancer outcomes*

Our history...

A Breath of Hope Lung Foundation was founded in 2008 by a group of Minnesota lung cancer patients and their families. The group recognized that this highly stigmatized and deadly disease would only receive the attention and funding it deserves through ongoing advocacy and public education.

Before incorporating, the founders hosted the first *Twin Cities Lung Run/Walk* to educate the public about lung cancer, support lung cancer patients and families, and raise money to support U.S. lung cancer research.

Today, the foundation raises more than one million dollars each year and hosts events all year long to support families, educate the world about lung cancer, and raise much needed dollars for research.

**A BREATH
of HOPE**
LUNG FOUNDATION

Circle of Light Donors

<p>Ambience Donors help us sustain and protect the infrastructure we have built. Ambient Light: Natural daylight that is already present in a scene.</p>	\$500
<p>Reflection Donors help us create hope for all who have been hurt by lung cancer. Reflected Light: Light seen after having bounced off a surface.</p>	\$1,000
<p>Key Donors help us focus on creating real awareness that will lead to earlier detection. Key Light: The main light on the subject, providing contrast and illumination.</p>	\$2,500
<p>Spot Light Donors help us shine a light on the injustice and stigma that must be overcome to save lives. Spot Light: Controlled, narrowly-focused beam of light.</p>	\$5,000
<p>White Light Donors help us change the world to provide hope and positivity to all who cope with lung cancer. White light: Space in the universe where positive energy is stored.</p>	\$7,500
<p>Incandescent Donors help us produce lasting life-saving disease education and change. Incandescent Light: Produces heat that glows.</p>	\$10,000

Yes
