

YES

Are between the ages of 50 and 80

YES

Currently smoke or quit smoking in the past 15 years

YES

Have a history of more than 20 pack-years of smoking (meaning you smoked an average of one pack of cigarettes each day for 20 years or two packs each day for 10 years).

Print this PDF and take it to your local clinic or your primary care physician.

Why should I be screened?

Based on this quiz, you are likely eligible for a low-dose CT scan to screen for lung cancer. When you visit your doctor or a local clinic, they will conduct a shared decision-making visit and make a referral to a nearby lung screening program. If you are unable to locate a screening program near you, call 952-405-9201 for more information about lung cancer screening in your area.

For more information about the benefits of lung screening for those at highest risk, visit abreathofhope.org/lung-cancer-screening-and-awareness/

Scan this QR code to learn more about lung cancer screening

Open the camera app on your cell phone or tablet.

Focus the camera on the QR code.

Follow the instructions that pop up on the screen to complete the action.
