

# A Breath of Hope

## LUNG FOUNDATION

At A Breath of Hope Lung Foundation, we're on a mission to change the world for the better by eradicating lung cancer and overcoming the many disparities, inequities and prejudices that impede progress in improving lung cancer survival rates.

These disparities have many causes, including a general disregard for people who smoke, as well as low socioeconomic status (SES). Minority Americans are disproportionately represented among the poor, the unemployed, and the undereducated, and lower SES is correlated with poorer access to health care services and poorer health outcomes.

Central to our mission is the belief that diversity and inclusion are catalysts for meaningful change. We work for equality, justice, and equity in all our initiatives. Our commitment to diversity is woven into the fabric of our organization and each program, from our leadership to our volunteers. Together, we're making strides toward a more inclusive society where everyone's rights are protected, and everyone's voice is heard.

A Breath of Hope Lung Foundation understands that health is a fundamental right, and access to healthcare should be equitable for all. We're dedicated to providing lung cancer education and support services that address the unique needs of every individual, regardless of their background, race, or socioeconomic status.

Our commitment to diversity and equity extends to our workforce, where we strive to create an inclusive environment that reflects the diverse communities we serve. With empathy and care, we're breaking down barriers to ensure healthier lives for all.
